Core Objectives of the Workshop

- ◆ To develop and promote awareness regarding the usage of AI generative in the field of translation.
- ◆ To share the practical strategies about the usage of AI generative in the field of translation.
- ◆ To provide a suitable technological platform for the translator, which is distinctive from the Machine Translations in view of speed and accuracy.

Expected Outcome

- ◆ Participants would get primary knowledge about translation in general along with the one using AI in particular.
- ◆ Participants would develop familiarity with various handles of Artificial Intelligence, working in the functional skill of translation
- ◆ Participants would develop awareness regarding what and what not to do in the concerned direction.

About the Workshop

This one-day workshop on 'The Role of AI in Translation into & from English' aims at bringing about the practical discussions about the use of the AI generative in the field of translations into and from the internationally auxiliary language of English. In the multilingual country of India, there are twenty-two languages recognized in the Eighth Schedule of the Constitution of India. Hence, translation of the works in them to English as well as vice versa is of utmost significance. In the changing scenario of the post- AI generative age, their role in revolutionizing the world of translation of different types will be looked at in the course of the interactive practical sessions of the workshop.
